Mixing process

- Get in contact with us and discuss your project, your needs and expectations
- Send us the audio files through WeTransfer or some other file transfer service along with as detailed information you can, including references regarding vibe, sounds, energy etc
- Pay for the job using paypal
- Your mix will be ready within 10 days from receiving the payment

What we expect from you

- To be realistic with your expectations in regards to the production. If you want the mix to be punchy, make sure everything is tight.
- Edit background vocals and make sure consonants are tight - especially important in background vocals that are meant to be spread left-right
- If you want your vocals to be in tune - make sure they are, or ask us for the additional service.
- We want the files delivered as 24-bit files in the sample rate you have worked in. All files starting from the same point (0:00)
- If you have a very specific effect on a sound - leave it on. If it just a delay or a reverb, take it off and leave it dry - we use highest quality Bricasti M7 Reverbs.
- Supply us with detailed references, i.e. "I really like the sound of the snare in "song" by "artist". "I really like how the chorus hits you in "song" by "artist", etc

What you will get from us

- You will receive a full mix, and if you like, an instrumental -, a "no lead" - and a "lead only" version
- Included in the price are two revisions within a week of completion
